Dear Sirs,

I write to ask your advice on a matter of some urgency. I am a student currently studying for a degree in Electrical Engineering at the University of Manchester. I am currently undertaking a project to design a new circuit for a professional electronic device. However, I am facing some difficulties in the design process and I would be grateful for your assistance.

I am specifically interested in the design of a feedback circuit to improve the stability of the device. I have already consulted a number of textbooks and online resources, but I am still struggling to understand how to implement the necessary components. I would be very grateful if you could provide me with some guidance on how to proceed.

Please let me know if you are able to assist me with this matter. I would be happy to provide you with more information about the project if necessary.

Thank you for your time and consideration.

Yours sincerely,
